 - **Tools:** Postman | IntelliJ | VsCode | Eclipse | Spring Tool Suit | Canva | Adobe Illustrator
 - **Version Control-** Git | Github
-

PROJECT WORK EXPERIENCE

Project1 | BingersHub

Utilized React.js | Skeleton Loading | TMDB API

Developed "BingersHub," a project leveraging the TMDB API to display comprehensive movie information from popular, top-rated, and upcoming categories. Implemented React Router DOM for seamless page navigation, utilized map function to iterate through API data, and incorporated skeleton loading for improved user experience. Effectively optimized rendering.

Project2 | VisualizationChartBoard

Utilized React.js | Chartjs | Axios | SpringBoot

Created a comprehensive visualization dashboard that extracts data from an API created using Spring Boot from the backend and presents it through various Chart.js visuals, including bar graphs, doughnut charts, pie charts, and line charts. Seamlessly integrated React Router, and Axios for efficient data management and user-friendly presentation.

Project3 | QuatidianStore - Artifact Store

Utilized Angular | SpringBoot

Created online store with a vintage look and proper design used angular in frontend and Implemented proper MVC structure for Spring boot Backend, incorporating Cart functionality, order Placing with RazorPay payment, and used MySql for Database.

EDUCATION

Bachelor of Science in Information Technology (8.98 CGPA)

Graduation Year (2023)

Mumbai University, Maharashtra

CERTIFICATIONS

- Java Full Stack Course (Edubridge-Capgemini)
- Javascript Mastery - GeeksforGeeks
